RÖHM PRODUCT SUMMARY

First class products by the specialist in clamping technology
RÖHM - DRIVEN BY TECHNOLOGY

The name RÖHM stands for speed, power and precision for more than 100 years. When it comes to powerful clamping tools, RÖHM is the partner and system supplier of choice. We are continually improving our products and services, actively expanding into new markets and using innovative production processes and technologies. With more than 50 registered offices and agencies from USA to Japan RÖHM is present on every continent and is close to customers everywhere.

"The clamping tools which we manufacture are as varied as the sectors we work for."

RÖHM eShop

The first online B2B eShop of the clamping technology industry provides you with the comprehensive range of RÖHM products.

Perfectly adapted in an intelligent design.
Persevering and precise specialists for even the toughest jobs.

Quick-action drill chucks industry

Quick-action drill chucks

Key-type drill chucks
Powerful, extremely capable and exceptionally durable. Plus top marks for processing precision.

LIVE CENTRES
FACE DRIVERS
Particularly successful and effective when power is attributed maximum priority. With a firm grip on larger sizes and heavy weights.
There’s no escaping here. Even heavy parts are clamped precisely and secured safely.
5 AUTOMATION TECHNOLOGY

The impressively flexible solutions for swift and dynamic clamping. Powerful, high-precision and therefore absolutely spot on target.

2-jaw parallel grippers  3-jaw centric grippers  2-jaw long stroke grippers  Swivel units

Synthetic grippers  Sealed parallel grippers  Compact long stroke grippers  Application-specific grippers
6

POWER CHUCKS
CYLINDERS / STEADY RESTS

Fast movements accompanied by a lot of pressure. And with tremendous tension for an absolutely secure hold.
With enormous strength from inside and outside. Also eminently suitable for sensitive and particularly thin-walled workpieces.

Cartridge mandrels  Segment clamping mandrels  Collet chucks

Clamping system CAPTIS  Special solutions for internal and external clamping
TOOL CLAMPING SYSTEMS

Outstanding performance thanks to perfect adaptation. Perfect in form and function for the best-possible transfer of high retention forces.

HSK - Automatic clamping set
HSK - SUPER-LOCK
HSK - Manual clamping set
SK - Automatic tool clamping set

Pull-in force measurement device
Clamping heads SPK
Built-in clamping head RESK
INDUSTRY-SPECIFIC SPECIAL SOLUTIONS

Our understanding of consistent customer orientation primarily involves the development of individual solutions in the entire range of clamping technology. We accept and master even the most difficult challenges.
