# BASIC SHRINK FIT CHUCK PSC 63 · ISO 26623-1

### CERTIFICATE OF QUALITY

- Chuck body fine balanced  
G2.5 25,000 rpm
- All functional surfaces fine machined
- T.I.R. < 0.00012" (3 µm)
- More accurate than DIN

### Use:

Shrink fit chuck suitable for all shrinking units.

- Interface with a unique tapered polygon and flange location face
- Exact positioning in the spindle
- Highest runout accuracy, torque and rigidity
- Innovative modular tool system with highest precision
- Suitable for both turning and milling centers
- Heat resistant hot-working steel
- For HSS (1/4" - 1"; 6-25 mm) and solid carbide tools
- Shank tolerance h6
- Included in delivery: Shrink fit chuck with back-up screw
- Balanceable by rings, milling or drilling

**HAIMER Shrink Fit can give you the edge that will allow you to sustain a long-term competitive advantage for your company.**

### **1. Unsurpassed machining accuracy**

We guarantee 0.00012" runout at 3xD. This degree of accuracy is consistently repeatable for any number of operators from shift to shift.

### **2. Slim profiles**

HAIMER Shrink Fit tool holders have very slim profiles. They can also be modified to a straight-walled design if needed in order to prevent tool holder collision with the workpiece.

### **3. Gripping torque**

Our shrink fit chucks grip the cutting tool 360° around the shank on multiple planes, delivering very high gripping torque that prevents chatter during roughing or finishing operations.

### **4. Consistency of setup**

A unique benefit of HAIMER shrink fit is that it eliminates any variation between tool changes. Removing these variables means regardless of the operator and their experience level, you will get repeatable uniformity in tooling setup and equally consistent results.

### **5. Extended reach options**

Shrink fit extensions provide many options. For example, when machining deep cavities, you can place shrink fit extensions into standard shrink fit chucks, getting unsurpassed gage lengths with minimal runout.

### **6. Balance accuracy and repeatability**

We hold our shrink fit holders to the highest balance accuracy standards (G2.5 @ 25,000 RPM). Since shrink fit holders have no moving parts, it offers the best balance repeatability of any tool holding system on the market.

### **7. Reduction of tool changing time and less tool holder accessory inventory**

Nothing beats the tool change time of our shrink fit chucks when combined with our Power Clamp shrink fit machines. Tool changes can be done in less than 5 seconds.

### **8. Clean bores**

Runout accuracy is often compromised if contaminants are introduced to the bore of a tool holder during machining. A shrink fit chuck is a sealed system by design. This minimizes the introduction of contaminants.

### **9. Coolant options**

Our shrink fit chucks are available with a variety of coolant options, including our Cool Jet and Cool Flash technology, which delivers coolant down to the cutting edge of the tool. This helps clean out chips and can aid in providing better part finishes.

### **10. Availability**

All of our products are available and stocked locally for North American customers and come in a wide variety of tapers and sizes – both in inch and metric.

HAIMER has the right shrink fit technology for any need with the largest range of shrink fit equipment and coils in the world.

#### Power Clamp Mini: HAIMER Quality in a small package

An economical introduction to shrink fit technology

##### Features:

- Intelligent coil technology makes shrinking simple and fast
- Tool changes in less than 5 seconds
- Ideal for the price-conscious user who only shrinks a few tools daily
- Shrinks solid carbide and HSS tools  $\varnothing$  1/8" – 5/8" (3 – 16 mm)

#### Power Clamp Special Edition: All you need at a great price

High performance shrink fit machine for all tools

##### Features:

- Intelligent coil technology makes shrinking simple and fast
- Tool changes in less than 5 seconds
- Contact cooling stations guarantee increased productivity with rapid cooling
- One-handed operations - all at the touch of a button
- Shrinks solid carbide and HSS tools  $\varnothing$  1/8" – 1 1/4" (3 – 32 mm)

#### Power Clamp Comfort NG: A premium shrink fit solution

Full performance with unbeatable efficiency

##### Features:

- All of the high performance features you know, with added capabilities to increase your output
- Rotary table allows for even faster shrinking and cooling
- New Generation Coil eliminates the need for stop discs, further simplifying the shrink process
- Additional HD Coil optional (shrink up to  $\varnothing$  2")
- Shrinks solid carbide and HSS tools  $\varnothing$  1/8" – 1 1/4" (3 – 32 mm)
