- High-Performance milling from 1/32" diameter
- Plunging and milling with one tool.
- Outstanding performance across a wide range of materials.
- Extreme cutting values and very high cutting depths, previously not possible for micro-precision tools.

Promotion is valid from 9/21/2021 through 12/31/2021 and only available through Productivity Inc.

**SYMMETRICAL
DRILLING GEOMETRY**

optimized for drilling and
ramping operations
excellent cutting edge stability

innovative flute form
very high tool stability
low-vibration cutting

new transition geometry
improves overall stability

GühroJet coolant ducts
guided cooling & lubrication
directly in the cutting area
for effective chip removal

new ultra fine carbide
optimum balance between
hardness and toughness
for micro-machining
applications
