1. Starting with an empty machine table, install 5th Axis 3613S plates for your specific table. Thread bolts into t-nuts, but do not torque bolts.
2. Space plates 3" (76.2mm) apart from each other. Use a mallet to initially align and straighten plates.
3. Install master pallet ([RL96-MP](#)) in center position (P89, P92, P95, P98) to indicate straight. Once aligned and indicated straight, torque mounting bolts to torque specifications.
4. For every position, install master pallet and set X and Y axes with touch probe or indicator for each work offset position.
5. Set Z zero on the top mounting surface of the Rocklock 3613S base for all work **offsets**.
