

# Improve Your Machining with Our New Drill Fix PRO™

Our Most Robust, Versatile & Economic Indexable Drilling Platform

The new Drill Fix PRO indexable drilling platform is overdelivering in tool life, productivity and hole quality. It's the perfect tool for obtaining high-quality holes, primarily in general engineering applications, and comes with a wiper included in every outboard insert to deliver ideal surface quality.

# SAVE

**JULY 3 -  
NOV. 3, 2023**

Valid for all geometries and grades, including the new **KCMS35** and **KCMS40**.

**DRILL FIX PRO PROMOTION:  
COMPETITIVE STEEL SWAP**

Buy **10** inboard and **10** outboard inserts, get the body\* **FREE**

\*Requires trade in of competitive drill body and purchase of inserts to receive new Drill Fix PRO body free of charge (KM bodies excluded).

Promotion valid July 3 - November 3, 2023 in the Americas. Promotion not applicable with other offers. No returns. Kennametal reserves the right to revise or cancel this promotion at any time. All sales are final and cannot be returned and/or exchanged for credit. Contact your local sales representative for more information.

## Cost-Effective & Versatile Indexable Drilling:

Drill Fix PRO offers an economic drilling platform that covers a broad spectrum of materials and applications.

## Robust Toolholder Design:

Extreme rigidity resulting in less deviations, vibrations and noise.

## Wiper Geometry on All Outboard Inserts:

Creating superior surface finish and hole quality.

## Optimized Coolant Delivery System:

Large twin coolant channels provide enhanced coolant flow, resulting in superior chip evacuation and increased tool life.

## Applications

## Additional Features

Maximized Chip Flute Size

Four-Times Indexable Inserts

Self-Centering Geometry

# Compatible with Our **NEW** KCMS35 and KCMS40 Indexable Drilling Grades

Our new stainless steel and high-temp alloy grades KCMS35 and KCMS40 meet the demand for reliability and increased tool life for indexable drilling in the petrochemical, chemical, energy and aerospace industries. These advanced high-PIMS grades feature a smooth coating surface, optimum layer adhesion and high depth-of-cut notching resistance to increase reliability and significantly extend tool life.
