# Pre-Engineered CNC Machine Tending Robotic Systems

**LOWER** initial investment

**SHORTER** lead times

**PREDICTABLE** results

## **ROBOFLEX PS** **PALLET STATION**

- Comes with two independent docking frames and two 40" x 48" engineered part pallets
- Ideal for large/heavy parts
- High-volume part queuing
- Multiple machine layouts possible
- Simple operation

### **System Options**

- FANUC iRVision 2D part locating system
- Re-grip/flip station
- Part inspection/exit chute
- Pneumatic vertical sliding shutter
- High-speed servo door actuator
- Upgrade to quick-change dual gripper assembly
- Additional machine integration
- Schunk KSP 160 Plus vise

### **Featuring**

**FANUC M-710iC**

**Medium Payload Intelligent Robot**

- Medium payload robot with a wrist payload of 12-70kg. Eight models are available for a wide variety of applications.
- Wide motion envelope and enough wrist load capacity to handle a large panel.
- Long reach and high motion performance make it suitable for many applications.
- The full cover provides IP67-equivalent resistance to environmental conditions (dust and liquid).
