T6200 SERIES

Valid from January 1st to June 30th, 2026

HIGH-PERFORMANCE GRADE SERIES FOR STAINLESS STEEL TURNING

T6215 and T6225 feature a thick, high-adhesion Al₂O₃ coating with a hardened outer layer, delivering superior wear resistance and long tool life

BUY 30 inserts
AND
GET 10 corresponding inserts

FREE
of charge!
Promo Code: TG259

*Offer must be ordered through our Customer Service Team, not available on Webshop.

Inserts:

ISO type

T6215

A CVD-coated grade suited for high speed cutting. Demonstrates superior wear resistance during continuous cutting.

New

T6225

Versatile CVD grade covering from continuous to light interrupted cutting. Provides excellent wear resistance in the medium cutting range.

TUNGALOY **ADD^{FORCE}TURN**
ACCELERATED TURNING & THREADING

Valid from January 1st to June 30th, 2026

HIGH-PRODUCTIVITY CBN GRADES FOR MULTIPLE MACHINING MATERIALS

BM05M coated CBN grade for high speed continuous cuts of hardened steel parts

BX4015 CBN grade for sintered alloys

SBN30 CBN grade for high speed machining of cast iron

BUY 8 inserts

AND

GET 2 corresponding insert

FREE
of charge!
Promo Code: TG260

*Offer must be ordered through our Customer Service Team, not available on Webshop.

BM05M

First-choice coated CBN grade for high-speed continuous cutting of hardened steel at speeds up to 1,148 sfm.

Inserts:

ISO type:
C, D, G, T, V, W

MiniForce-Turn:
DX, WX

SBN30

Solid CBN grade for high-speed cast iron machining, offering deep cuts, high feeds, and exceptional wear and fracture resistance.

Inserts:

ISO type:
C, R, S

BX4015

CBN grade for sintered alloys, delivering excellent performance in continuous to light-interrupted cuts.

Inserts:

ISO type:
C, D, T, V

DEEP FACE GROOVING OF UP TO 10 MM DAXN AND UP TO 0.354" GROOVE DEPTH IS POSSIBLE

Extremely rigid insert clamping ensures tool stability during deep face grooving operations.

Sharp cutting edge, **combined with SH7025, the latest PVD grade**, provides long tool life and superior surface quality. The direct coolant supply from holder and insert geometry effectively redirects chips out and away from the part.
